INTERVIEWS WHAT'S NEW?

By Joel Zuckerman

One of the youngest proponents of the avant-garde in the United States, this young man is

named John Trend with a small letter. John Trend is a student at the University of Chicago and works at the National Center for Experiments in Television. He was born in 1950 in New York City.

On the cover, John Trend has been shown in the act of working on a new film. The film is entitled "The Time Machine." The Time Machine is a science fiction novel by H.G. Wells, first published in 1895.

In this interview, John Trend talks about his work as an experimental filmmaker and his views on the future of television. He also discusses his own personal experiences with television and how it has influenced his work.

John Trend is one of the few filmmakers who has achieved success in the avant-garde film world. His work has been shown in many international film festivals and has received critical acclaim. He is currently working on a new project that he hopes will be his breakthrough film.

Like other avant-garde filmmakers, Trend is concerned with the future of television and how it can be used to challenge traditional forms of entertainment. He believes that television can be a powerful tool for social change and that it has the potential to be used for political purposes.

In this interview, Trend talks about his work as an experimental filmmaker and his views on the future of television. He also discusses his own personal experiences with television and how it has influenced his work. He hopes that his film, "The Time Machine," will be his breakthrough film and will help to redefine the future of television.

John Trend's work is characterized by its focus on the human condition and its exploration of the relationship between technology and society. He uses a variety of techniques in his films, including animation, photography, and sound design, to create a rich and complex visual experience.
