

COMMUNITY VIDEO IN NEW PALTZ

New Paltz, New York, is located about eighty miles northeast of New York City. New Paltz is 1) a college town 2) a farming town and 3) the victim of incredible urban sprawl. There are so many different types of people in New Paltz, that the problem of social integration among the populous is a staggering one. There is no doubt about it—New Paltz is a highly polarized community.

... "in" steps the Community Video Project. What are we all about? It is our intention to help to bring the community together via video. After checking out the disparate elements within the town, we concluded that the only thing that the community has in common is one nasty habit: they all watch the tube. So we have set out to present via the New Paltz cable system (independently owned) some "community programming." Perhaps a definition is in order. To our way of thinking, "community programming" is programming that originates at the grass roots level—in this case, in the town or village of New Paltz, and concentrates on an individual within a larger entity—the community. We show people at work, at play, just hanging out, at civic affairs (meetings, library fairs, etc.). We concentrate on the old, the young, the middle aged, the poor, the rich, and the middle class. In other words, we want to put everybody on the box doing what they normally do and showing their special gifts and interests. We have all lived here four years or more, so we know a good many people in a community of about 7500.

Each week, we put on an hour feedback, "Community MIX," along with our other programming, which right now is pretty sporadic, but developing nicely. "COMMUNITY MIX" is more or less a collage of things and people in the community, including the college (five thousand students). We put out our software on half-inch Sony AV-3400 and 3650s. So far, community response to our experiment has been really astounding. All those disparate elements which I glanced over earlier in this article have all been responsive. Most response has been extremely positive, and criticism (much of it justly deserved, some of it unfounded) has been generated to a lesser degree.

Our only hassle now is the problem of commercials. Our Project is against commercials on Channel 12 (New Paltz's cable station). It is not that we oppose commercials per se, it is only that the power structure in this community is such that the real estate-banking-insurance conglomerates, the group responsible for the urban sprawl and loss of character in New Paltz, is in power here. We don't want to see a community station go the way of all flesh in this place, and become absorbed into this insidious structure. Presently, we are showing people at their places of work, in their stores, restaurants, etc., and these programs have been pretty interesting. It's all free, and serves the community a lot more fruitfully—a community paying six dollars a month for a cable should not be subjected to advertising too. Anyway, we're trying to work it out and see what happens.

Incidentally, we have unlimited access to the channel, and no outside censorship, so it's a pretty good situation. The cable owner has been extremely cooperative (Russell Bogie) and we really have a free hand. So far.

Anybody in the videosphere who is interested in sending or swapping us some tape for showing on Channel 12, don't hesitate to contact me:

DOWNSVILLE COMMUNITY TV

There's a funny, funky video thing happening in Downsville, New York in the Catskills. At a pre-scheduled time, on a given evening each week, a green VW van pulls up to a telephone pole on a country road and unhooks two cables which are hanging there waiting to be plugged into a Sony 3600 or a portapack. With the flip of a few switches, the local community cable cast begins. In their homes, all the local folks are sitting eagerly by their TV sets, waiting to see themselves, their friends and neighbors on Channel 3. Usually there are some live announcements, an invitation to come on down and be on TV, and a description of the tapes to be played. There are strong requests for feedback: any technical problems (interference on other channels, bad audio, etc.) as well as requests for ideas on programs people would like to make or see made. Our first official cablecast was interrupted temporarily after the first tape was shown in order for us to follow some fire engines down the road to report on a fire. We returned shortly to resume transmission, having arrived at the fire too late to catch it, but we did interview some people who had been there. Lots of people stopped by to tell us they were watching (some even invited us to a backyard barbeque), and of course the usual entourage of kids showed up on their bicycles to see themselves on television.
