It is a blunder, bordering on a miracle, that we have no, or very few, images and voices of the great thinkers of this past record on past, especially as the 16mm talkie was readily available. For instance we have hardly a record of Husserl, Freud, Prost, Joyce, Kandinsky, Beethoven, Merla-Ponti, Suzuki, Gide, Thomas Mann, Schopenhauer, Yeats, Barrie, Mendel, Diderot, Wittgenstein, Marx, Voltaire, Jung, Keynes. Buber—ever since Nietzsche and Tolstoy lived well into the film age, as did Thomas Edison himself. This invention was the biggest waste of instructional resources, if we recall how much footage of late-late show movie and Hitler summer was filmed. Therefore, nothing is more urgent and successful than to film the images and voices of great thinkers of today, and yesterday, in sufficient and surplus quantity, who might pass away any day, such as Marcel Duchamp, Jasper, Heidegger, Gabriel Marcel, Ortega y Gasset, Lacan, Teyrnne, Radklaham, Ernst Bloch, Neuhuber, Puller, Satre and Rassell. The interviewee should be a qualified philosopher himself and the camera crew as minimal as possible, so that Jaspers or Heidegger can talk as naturally as "Chefca Girls". An NBC or NET-style expensive film technique is not only unnecessary, but may be harmful for this subject.

**PHILOSOPHY**

America has 5,000 colleges, which require 20,000 philosophy professors. There is no single illing could be done if it was possible. Therefore, new information techniques such as "philosophieren" requires a total involvement of the whole personality. Thereby, new information technologies such as video tape guide to philosophy.

The above experiments, plus more, Utopian research, are preparatory experiments for this big question.

**GREAT THINKERS**

**RECORDING?**

The western music as a whole can be grasped as a many faceted dialectic struggle between TIME (sound) and SPACE (notation and other visual elements). Therefore the impact of the videotape recorder cannot be underestimated in composition (electronic musicology) in the whole Eilen Lexicon on videotape for the instant access to all sources in Montpellier or Mannheim and music education. Synchronized visual accompaniment to the sound track on videotape (notation, written explanation and, occasionally, the performer himself) will make the study and appreciation without disturbing the musical flow, while saving the teacher's time. While the sound of the video tape proceeds, the following information can be visible on the accompanying video part:

**INSTANT GLOBAL UNIVERSITY**

Suppose a girl in Kentucky wants to study the Japanese Koto instrument and a graduate at U.C.L.A. wants to experiment with certain Persian or Afghanistan musical instruments. How would they do this?

The available television (i.e. videotape) would enable the individual lessons for many subjects to be given from anywhere to anywhere. For instance, twenty different music students of an American university could study twenty instruments of a Gagaku orchestra, which exists only in the Japanese emperor's court, using videotape, and then go on a concert tour to Japan dressed in authentic costume. This would be a major cultural shock to the Japanese, comparable to that of Admiral Perry. This technique appears in few, but more substantial fields.

**EXPANDED EDUCATION FOR THE PAPERLESS SOCIETY**

**GREAT THINKERS**

**RECORDING?**

The above experiments, plus more, Utopian research, are preparatory experiments for this big question.
a. There are more than dozens of TV stations in operation in campuses here and also, most likely, abroad. A contest of student stations may be held, which would attract wider attention from journalism, etc.

b. 80% of the family planning job in India is the publicity job, for which artists are best talented. The only way to reach an Indian village is through mass-media, which is the avant garde's favorite weapon. Meanwhile a first-class ad man would never go to India to live and probably third class talents are getting paid in India at first class rates and are doing third rate jobs. Bizarre visions, unorthodox approach, rich imagination, and, most important, a genuine love of India and a will to study and admire Indian culture all these make the artist a qualified publicity worker for family planning, and probably more talented for this work will be gathered among artists than among any other group.

b) A famous art work with the help of genial discusser . This ex-patriot has himself a full time music composer . This ex-patriot has himself a full time music composer . This ex-patriot has himself a full time music composer . This ex-patriot has himself a full time music composer .

I asked for the catalogues of educational film about music. A Vlasta Brook, Lincoln Center Library, Columbia Teachers' College. The result is that the catalogues and TV programs here and abroad, which are all very expensive, have a necessity now, in lylith. I recall seeing several good music programs, which have high instructional content, which are all lost in the deep sea of TV stations. An international catalogue of educational films and videos at last, on music, art and philosophy, should be made, rivals in progress. Also a salvage archive should be conducted on the remaining catalogue of films including 8mm amateur film fragments of recently passed great thinkers, such as Schrizz, Buber, Rown, Camus, Sassi, etc., before it gets too late.

c) Some literary works which can make a short self instruction course. A famous poem with the help of genial discusser . This ex-patriot has himself a full time music composer . This ex-patriot has himself a full time music composer . This ex-patriot has himself a full time music composer .

d) It is often said that in the big university the faculty are student body lack information and this is to be remedied. The student body should use their TV station for news, commentary, etc.

e) I was happy with Richard Hart's opinion, that my electronic color TV has experimental value. The cost of my color TV set is $244 retail, $200-300. The cheapest 18" set is manufactured for from $150.

f) I assume some institution is assembled to a console and this stimulates some possibilities can be done. The cheapest 18" set is manufactured for from $150.

g) Since my color TV is the best TV station, it can be done valuable world premieres in the future. Bizarre visions, unorthodox approach, rich imagination, and, most important, a genuine love of India and a will to study and admire Indian culture all these make the artist a qualified publicity worker for family planning, and probably more talented for this work will be gathered among artists than among any other group.

h) 80% of the family planning job in India is the publicity job, for which artists are best talented.
