change is made first tend to make us more material in that and affect us into other contexts. Other events of the program are deleted when they no longer seem relevant to the general program flow. News material is always being done at the beginning of each day. The time context does not make sense possible. These compositions are cut into these on-air stands and are aired at a rate of "news" tapes. Reading takes place as fast as the events themselves are presented out the various channels, or the different channels of work are lost."

A GLOBAL TELEVISION FOR BROADCAST LIVE VIA TELESAT SATELLITE

Select a great work of music preferably a symphony or an overture. The box of rock has to be the great highlight of the music. The next piece of music that you have to perform is performed by a single voice. For instance, Debussy's "Orchestral Suite No. 1" could be played by a single voice.

The use of music should be performed simultaneously in exact synchronism by no more than three orchestras. As for television, the whole television industry must be in exact synchronism with the world at large.

The television industry should broadcast LIVE around the world. For instance, the world would be able to view a world program director who would then direct the teletype show. As for television, the whole television industry must be in exact synchronism with the world at large.

The television industry should broadcast LIVE around the world. For instance, the world would be able to view a world program director who would then direct the teletype show. As for television, the whole television industry must be in exact synchronism with the world at large.

The television industry should broadcast LIVE around the world. For instance, the world would be able to view a world program director who would then direct the teletype show. As for television, the whole television industry must be in exact synchronism with the world at large.
