Let's go back for a moment and look at the diagram Paul Ryan included at the bottom of his first page. He identifies the Lekton as subject to disturbances due to the underlying relations to them.

Paul's diagram was misleading in one aspect, so please do not be confused by it. Consider it as Pierce did. He did so without much explanation of it. There is also a minimal trial. Let's look at another aspect of the diagram. The direct relationship between THE SUN and the Lekton is a strictly true or false one, and so it is in the kind of relatedness with which science mostly chooses to deal. It's a form.

However, the relation between THE SUN and the Lekton is of subject to disturbance and the Lekton has a certain ambiguity of subject to error by the perception distortions. My camera may have been faulty or the weather may have been bad, or the aligning was not timed right but it may be corrected. The Lekton is a real, but it may be false. It is both true and false, but it only relates to the other two parts. Together they make a minimal trial.

Look at the other two parts. The direct relationship between THE SUN and the statement is a strictly true or false one, and so it is in the kind of relatedness with which science mostly chooses to deal. It's also a form.

Finally, let's loop way back into Paul Ryan's Part I where he talked of Guerilla Warfare in general terms. We end up with the statement: "A conventional pyramidal chain of command must maintain its ambiguity below a narrow set of people, but its radius of dissonance of high ambiguity must extend as far as possible. Strong, energetic media must be creative, energetic and make relevant exceptions to the context of acceptable attitudes with attentive relaxation of those members not in the line of fire."

Lest, let me confess Paul somewhat in his wending about what he deems deception as a tool of the establishment and its cultural automatons, that Guerilla Warfare is a tool that can be used to confuse the establishment and its cultural automatons, that Guerilla Warfare is a tool that can be used to confuse the establishment and its cultural automatons, that Guerilla Warfare is a tool that can be used to confuse the establishment and its cultural automatons.
